

TILAK BV

Computer Science & Engineering Student | Full-Stack Developer

Chikkaballapur, Karnataka, India | +91 9353056798 | tilakatilakachary@gmail.com

LinkedIn: linkedin.com/in/tilakatilaka | GitHub: github.com/tilakchary05

PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented Computer Science engineering student with hands-on experience in full-stack web development, backend systems, and data science infrastructure. Proven track record of architecting fully functional software solutions, including an AI-driven computer vision application and structured campus databases. Winner of a competitive technical hackathon and proactively certified across core domains including AI, Cloud Computing, and Computer Networks. Eager to leverage strong analytical capabilities and a versatile technical stack to contribute to high-impact development initiatives.

TECHNICAL SKILLS

- Programming Languages:** Python, Java, C, C++, PHP (Full-Stack & System Logic)
- Web Frameworks & Core:** Flask, HTML5, CSS3, JavaScript (ES6+)
- Databases & Storage:** MySQL, SQL Structured Query Language
- Developer Tools & OS:** Git, GitHub, VS Code, Windows Environment
- Domain Expertise:** Cloud Computing Architectures, Data Science Workflows

EDUCATION

B.E. / B.Tech in Computer Science & Engineering

2023 – 2027

C. Byregowda Institute of Technology, Kolar

Expected Graduation

Affiliated with Visvesvaraya Technological University
(VTU), Belagavi

Pre-University Course (PUC)

Completed: 2022

Best PU College, Chikkaballapur, with the 76%

PROFESSIONAL INTERNSHIPS

Data Science Intern

3 Months Term

Agartaas Academy

- Acquired hands-on domain experience working with foundational data science concepts, statistical parsing, and analytical workflows.
- Utilized core Python scripts to manipulate structured datasets, translating academic paradigms directly into practical tech environments.

TECHNICAL PROJECTS

Drowsiness Detection System

Academic Project

Tech Stack: Python, Flask, MySQL, HTML, CSS, JavaScript

- Engineered a fully functional real-time software monitor designed to track and detect user drowsiness through automated script-level backend analytics.
- Built a robust, localized server architecture using Flask and a secure MySQL login schema, handling sessions and credentials efficiently.
- Designed an interactive UI featuring dynamic feedback indicators using native CSS layouts and responsive JavaScript behaviors.

Smart Campus Web Application

Academic Project

Tech Stack: PHP, MySQL, HTML, CSS, JavaScript

- Architected and deployed a multi-module administrative platform intended to streamline campus administration and data management protocols.
- Programmed secure user access tokens and modular relational schemas in MySQL to safeguard institutional student datasets.

HONORS, CERTIFICATIONS & ACTIVITIES

- **Hackathon Winner (3rd Place):** Awarded cash prize and official merit certificate for innovative product design and software execution in a competitive technical sprint.
- **Technical Certification:** Artificial Intelligence (AI) Domain Workshop — Core Concepts & Architecture Models.
- **Technical Certification:** Computer Networks (CN) Technical Seminar — Deep-dive on network protocols and routing frameworks.
- **Technical Certification:** Cloud Computing Domain Training — Distributed architectures and server fundamentals.
- **Student Coordinator:** Actively engaged as a proactive student team participant, helping orchestrate institutional activities and departmental projects.
